TITAN-AX SERIES

TITAN-AX12 TITAN-AX15

WARNING AND SAFETY INSTRUCTIONS

1. READ ALL INSTRUCTIONS

Carefully and become familiar with the features and functions of these products before operating them.

2. RETAIN THESE INSTRUCTIONS

For future reference.

3. COMPLY WITH ALL WARNINGS

All warnings and instructions for this product should be adhered to.

4. USE WITH AMPLIFIERS

In order to avoid damage to drivers and other equipment,, it is advisable to establish and follow a routine for powering up and powering down a sound system. With all system components connected, turn on source equipment (mixers, signal processors, record and playback units, etc.) BEFORE powering up amplifiers. Transient voltages from powering up source equipment can damage speakers if amplifiers are already turned on. Make sure that amplifier volumes are set to their minimum settings and power up any system amplifiers LAST. It is recommended that all system components be allowed to stabalise for several seconds before powering down any other system components.

5. CABLES

Do not use shielded or microphone cables for connection between amplifiers and speakers. Use only approved speaker cables with proper connectors.

6. RIGGING - SUSPENDING - MOUNTING

Rigging, suspending and mounting of these speaker systems can expose members of the public to serious health risks and even death. Under no circumstances attempt to rig, suspend or otherwise mount these speakers unless you are fully qualified and certified to do so by relevant local, state and national authorities. All relevant safety regulations must be followed. If you are not properly qualified or do not know of pertinent regulations, consult qualified personnel for advice.

7. CAUTION

These professional loudspeaker systems are capable of generating very high sound pressure levels. Use care with placement and operation to avoid exposure to excessive volume lefels. Permanent hearing damage can result when operated to extreme levels.

8. SERVICE

There are no user serviceable parts inside the product. Users should not attempt to service this product. Warranty nullification could result if this is attempted.

INTRODUCTION

The Titan-AX Series fuses affordability and audio fidelity into an exceptionally lightweight polypropylene cabinet. Performance is achieved across multiple applications, from mobile DJs and bands, to corporateevents and fixed installation. Built around the best components, including a titanium compression driver and heavy-duty cast-frame woofer, Titan delivers the high level, even dispersion and sonic integrity usually associated with much more expensive speakers.

Our latest generation of Titan-AX features new proprietary driver technology, The HF has been completely reevaluated for both coverage and sound quality ensuring a much smoother sound, especially at high output while the all-new LF driver has improved moisture rejection characteristics which allows Titan-AX to be installed into hostile environments.

Titan-AX raises the bar for portable PA and is built-to last.

KEY FEATURES

- Class D Bi-amplified
- Large voice coil LF Drivers reject moisture for resistance in all environments
- New IRIS X HF Compression Drivers
- New Proprietary 100° x 80° Hybrid Symmetry Horn design
- New DSP functions
- New tweaked laminar rib structure
- Integral mixer functions

- Tough, yet lightweight Dynamic Polypropylene cabinet with rubber padded handles
- 10 x M8 rigging points and integral 35mm tripod stand adapter
- Rugged protective grille and top-stacking receptacles
- Trapezoid design for arrays as well as stage monitor applications
- Titan Tourbags available
- For installation hardware choices visit www.wharfedalepro.com

INSTALLATION

Titan-AX Series speakers are both equally suitable for portable use and for rigging / fixed installation. Before attempting to install a Titan-AX loudspeaker system please refer to the important warnings and safety instructions. Only qualified personnel should install a loudspeaker system.

Improper installation of a loudspeaker system can cause serious harm and even death if correct procedure is not followed. Anyone attempting installation assumes all liability arising from such use.

Titan-AX12/Titan-AX15 REAR PANEL FEATURES

1. Heat Sink:

The heat sink allows for dissipation of heat build up from the amplifier via air cooling at the rear of the enclosure.

2. VOLUME controls for INPUT A and INPUT B:

These knobs control the level of each input channel.

3. DSP setting

4. DSP Selection

5. 90Hz Monitor Filter switch:

Used to reduce bass buildup when placed on floor or near a wall.

6. Horn LED defeat switch:

Switches off the horn power LED for discrete applications.

7. GAIN selection switch:

This switch selects the proper gain structure for INPUT A. If a microphone is connected to INPUT A, use mic mode (up). If the signal source is anything other than a microphone (playback device, keyboard or mixer output, for instance) use the line selection (down).

8. POWER 'ON'.OFF switch, Power "ON" indicator LED and LIMIT indicator LED:

The bracketed LED to the left of the POWER switch illuminates when the power switch is in the 'ON' position. The LIMIT LED illuminates when the signal limiter is limiting the level of the signal to prevent distortion and overload.

9. POWER ON / OFF switch:

This switch turns the power on and off.

10. Output source "LOOP / MIX" switch:

In the "LOOP" mode, this switch routes the signal of INPUT B to the line level XLR OUTPUT jack, bypassing the EQ section and volume control. When in the MIX mode, this switch routes the combined (or "mixed") signals of both INPUT A and INPUT B to the line level XLR OUTPUT jack.

11. XLR / ¼" COMBO input jacks for INPUT A and INPUT B:

These convenient jacks allow XLR or ¼" balanced input connections to INPUT A and INPUT B

12. POWER cord receptacle:

This is a receptacle for a standard IEC, three prong, grounded AC electrical connection cord. Be sure that you are plugging into the correct source voltage that matches what is indicated just below the power cord jack.

13. XLR line level OUTPUT jack:

This jack provides a balanced line level output for connection to additional powered subwoofers or amplifiers.
